3. Funding is needed to define and identify sources of surface water quality problems associated with irrigated agricultural runoff, and to implement measures to reduce or eliminate polluted runoff from irrigated agricultural land;
4. The SWRCB considered input from the U.S. Environmental Protection Agency and State government agencies associated with agricultural practices in California, a broad spectrum of stakeholders, and the public regarding the development and implementation of the AWQGP;
5. The SWRCB adopted Resolution No. 2004-0053 on August 26, 2004, approving the AWQCP Guidelines for implementing the program;
6. The proposals on the Recommended Projects List (RPL) were reviewed according to criteria in the AWQCP Guidelines by a review panel made up of staff from the SWRCB, eight Regional Water Quality Control Boards, US Environmental Protection Agency, US Geologic Survey, CA Bay-Delta Authority, CA Department of Food and Agriculture, CA Department of Pesticide Regulation, CA Association of Resource Conservation Districts, Wetlands Subcommittee of the Interagency Coordination Committee, UC Davis Department of Entomology, and UC Sustainable Agriculture Research and Education Program.
